Expertise

- AI Integration
- AI Coding
- Agentic AI

Backend

- C#
- ASP.NET Core
- Web API
- REST API
- JWT Authentication
- Python
- PHP
- Node.js

Frontend

- HTML
- CSS
- JavaScript
- TypeScript
- jQuery
- React.js
- Next.js

Database

- SQL Server
- MySQL

Tools

- Git
- GitHub
- Nginx
- Swagger
- Docker

ALLAN GEOFFREY FEOSAR .J.B

Full Stack Developer

Full-Stack Web Developer with hands-on experience architecting scalable backend APIs and responsive user interfaces using C#, ASP.NET Core, JavaScript, and SQL Server. Proven track record in designing secure RESTful microservices, implementing robust JWT authentication workflows, and optimizing database schemas. Adept at bridging modern frontend frameworks with resilient cloud-ready backend architectures.

Technical Skills

Backend

C#, ASP.NET Core Web API, RESTful APIs, Node.js, Python, PHP, JWT Authentication

Frontend

JavaScript (ES6+), TypeScript, React.js, Next.js, HTML5, CSS3, Bootstrap, jQuery

Databases

Microsoft SQL Server, MySQL, Database Normalization, Indexing & Query Tuning

Tools & DevOps

Git, GitHub, Docker, Nginx, Swagger/OpenAPI, Postman

Concepts

Microservices Architecture, CRUD Operations, MVC Pattern, State Management

Professional Experience

STA Technologies | Full Stack Web Developer

2025 - Present

Designed and deployed modular RESTful APIs using ASP.NET Core Web API, enhancing backend integration efficiency across core products.

Implemented secure token-based authentication (JWT) with automated refresh token mechanisms, protecting critical platform endpoints.

Engineered responsive, mobile-first web interfaces using modern JavaScript, HTML5, and Bootstrap, improving UI rendering speed and usability.

Structured relational database schemas in SQL Server and optimized complex SQL queries to reduce backend response latency.

Configured deployment pipelines and hosting configurations using Nginx and Docker to support seamless continuous integration.

Red Sky | Full Stack Web Developer

2024 - 2025

Developed dynamic front-to-back web modules using PHP, JavaScript, and MySQL for client-facing applications.

Collaborated with design and QA teams to integrate third-party REST APIs and implement cross-browser responsive interfaces.

Streamlined API documentation using Swagger, accelerating client integration workflows.

Resolved production bug tickets, optimized UI components, and contributed to version-controlled team codebases via Git.

Customer & Operations Services | Service Operations Associate

2019 - 2023

Managed client service workflows, customer communication, and issue troubleshooting across daily operations.

Education / Certifications

Bachelor of Computer Applications (BCA) | University of Madras

2022 - Present

Diploma in Mechatronics Engineering | Government Polytechnic

College, Purasawalkam

2016 - 2019

Full Stack Development Certification | Red Sky Institute

Jun 2023 - Dec 2023
